Summary

Full-Stack Software Engineer with experience developing scalable applications using Angular, React, Node.js, Express.js, MySQL, and MongoDB. Strong in REST APIs, secure authentication, performance optimization, and solving 400+ DSA problems.

Technical Skills

Languages:	Java, Python, JavaScript, TypeScript
Frontend:	Angular, React.js, HTML5, CSS3, Bootstrap
Backend:	Node.js, Express.js, NestJS, REST APIs, JWT Authentication, RBAC, MVC Architecture
Databases:	MySQL, MongoDB
Cloud & Tools:	AWS (Cloud Practitioner), Docker, Git, GitHub, Redis, Postman, Swagger, Figma
Core CS:	Object-Oriented Programming (OOP), DSA, DBMS, Operating Systems , Computer Network

Experience

Software Developer Intern

Mar 2026 – Present

Recordent Private Limited, Hyderabad

- Created and enhanced full-stack features for Membership, Buyer Management, Subscription, Admin, and Credit Risk modules using Angular, Node.js, Express.js, and MySQL in a production fintech application.
- Designed and introduced 2 Retail and MFI Credit Risk forms with validation, REST API integration, and MySQL database support for credit assessment workflows.
- Enhanced 8 payment modes by adding search, pagination, and financial-year filtering using Angular, backend APIs, and MySQL.
- Successfully upgraded the production application from Angular 14 to Angular 16 and Bootstrap 4 to Bootstrap 5, resolving dependency conflicts, build failures, and UI compatibility issues.
- Resolved 30+ production issues across frontend, backend, APIs, SQL queries, reporting, and subscription workflows, improving application stability and reliability.
- Handled sensitive data masking, and VAPT-compliant file upload validation to strengthen application security.
- Collaborated with a team of 5 developers using Git, GitHub, Swagger, Postman, GitHub Copilot, and Claude for feature development, code reviews, debugging, testing, and production deployments.

Backend Developer Intern

Jul 2025 – Aug 2025

CodexIntern

- Crafted 10+ RESTful APIs and backend services using Node.js, Express.js, and MongoDB following REST architecture principles.
- Added CRUD functionality, JWT-based authentication, and authorization to secure user access across multiple API endpoints.
- Collaborated with a team of 6 developers to test, debug, and optimize business logic,improving API and application reliability.

Projects

Buyer Data Management System

Feb 2026

- Delivered a full-stack Buyer Data Management System with 8+ React screens using React.js, Node.js, Express.js, and MySQL.
 - Produced 12+ REST APIs with JWT authentication, CRUD functionality, search, and pagination.
 - Added CSV/Excel import with validation to process 1000+ buyer records in a single upload.
 - Connected the React frontend with MySQL through REST APIs for secure buyer data management.
- GitHub — Live Demo

NotesApp — MERN Secure Notes Management Application

Mar 2025

- Built a full-stack secure notes management application using React.js, Node.js, Express.js, and MongoDB with JWT authentication
 - Developed 10+ REST APIs with CRUD functionality, advanced search, and tag-based filtering for secure note management.
 - Revamped 6+ responsive screens and integrated Express.js APIs with MongoDB Atlas for seamless data storage and retrieval.
 - Deployed the application on Render, managing 2 MongoDB collections and secure user authentication.
- GitHub — Live Demo

Certifications

- AWS Certified Cloud Practitioner (CLF-C02) — Amazon Web Services View Certificate
- MERN Stack Development — Pluto Academy
- Data Structures and Algorithms - Apna college

Coding Profiles

- Solved 400+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
- Strong proficiency in Arrays, Strings, Linked Lists, Trees, Graphs, Dynamic Programming, and Greedy algorithms.
- LeetCode — GeeksforGeeks

Education

B.Tech in Computer Science and Engineering (Data Science)

2023 – 2026

Geethanjali College of Engineering and Technology, Hyderabad

CGPA: 7.6
